Hello! I am İbrahim Ethem Küçük, a junior developer with a passion for web technologies and experience in frontend technologies such as HTML5, CSS3, React.js, and Next.js. Additionally, I possess foundational knowledge in backend development using C#, allowing me to approach projects comprehensively. Through various work experiences, I have built a strong foundation in rapid learning, solution-oriented approaches, and collaboration within a team. My goal is to stay closely aligned with technological advancements, contributing to your projects by delivering creative and effective solutions.

Experience

Advanced Systems and Innovation Laboratories

January 2023 - August 2023

- In my academic experience, I led web development projects in a leadership role, effectively communicating software development principles through educational materials. I managed projects, fostering team communication and collaboration, aligning technical requirements with educational goals. I enhanced education quality by developing customized solutions and taught efficient software development methods to students. Contributing to projects, I conducted code reviews and tests to ensure software security and quality, emphasizing best practices. Detailed documentation allowed for effective progress tracking.

RECOM Project Erasmus + & SaveLife Project- Erasmus+

January 2023 - August 2023

- During the RECOM Project (Erasmus+ & SaveLife) from January to August 2023, I showcased strong software development skills with a focus on web design and coding. In addition to contributing to international communication and project management, I demonstrated effective solution-focused thinking, prepared project documents, and excelled in presenting complex technical concepts. My role required both teamwork and leadership in a multicultural setting, fostering an openness to learning and mentoring experience.

SKY LAB: Yıldız Technical University Computer Science Club

March 2020 - ...

- I was involved in activities in the field of Web Development.
